Foomatic-GUI Printer Test Page

Congratulations!

If you can read this information, you have correctly installed your printer. If you have a color printer, the penguin should be yellow.

The following information describes your printer driver and filter settings:

Queue Name:	QUEUENAME
Printer:	PRINTER
Driver:	DRIVER
Description:	DESCRIPTION
Location:	LOCATION
Connection:	CONNECTION

To print to this printer in the future, use the “Queue Name” shown above. You can use the “foomatic-printjob” command or your spooler's usual command (often “lp” or “lpr”).

Thank you for using Foomatic-GUI!

(Test page ends.)
