Multiple styles test

This test ensures that multiple classes can be applied to an element and that order matters.

Class definitions:

```
styles:
  foo:
    textColor: red
    fontSize: 20
  bar:
    textColor: blue
    alignment: TA_CENTER
```

`.. class:: foo:`

This is red, left aligned and large.

`.. class:: bar:`

This is blue, centre aligned and small.

`.. class:: foo bar:`

This is blue, centre aligned and large.

`.. class:: bar foo:`

This is red, centre aligned (as `foo` doesn't specify aligment) and large.
